

# Sudden Unexplained Infant Death Investigation

A Systematic Training Program for the Professional  
Infant Death Investigation Specialist

DEPARTMENT OF HEALTH AND HUMAN SERVICES  
Maternal and Infant Health Branch  
Division of Reproductive Health  
Centers for Disease Control and Prevention  
Atlanta, Georgia 30333

### HOW TO USE THIS TRAINING TEXT

This training text is designed as a general resource for the Sudden, Unexplained Infant Death Investigation (SUIDI) Specialist trainee. Each topic has been verified and determined essential to the on-the-job success of the investigator and should be reviewed often during the training program.

### LIVING DOCUMENT

As modifications in the workplace occur, and process improvements take place, new and additional information should be provided to the students. During the classroom portion of the program, individual instructors may supply additional “handouts” during their specific section of the class. These handouts should be inserted into a trainee notebook as a resource for future review and application.
